

SuperFirulai

\$FIRU — Official Whitepaper

Version 1.0 · Solana Blockchain · superfirulai.com

SuperFirulai (\$FIRU) is a community-driven meme token built on the Solana blockchain. This document summarizes the project's purpose, tokenomics, security measures and roadmap in plain terms, so that anyone considering the project can verify the facts independently rather than relying on marketing claims.

1. Introduction

SuperFirulai is a meme token launched on Solana, built around a simple idea: memes bring people together, and a strong community can outlast any single market cycle. The project combines a lighthearted, community-first brand with concrete, verifiable commitments around liquidity and contract transparency — the two things that matter most when evaluating any token in this space.

2. Vision & Mission

Vision: to build one of the most transparent and community-owned meme projects on Solana, where every major claim — liquidity locks, contract behavior, supply — can be verified on-chain by anyone, at any time, without needing to trust the team's word alone.

Mission: grow a genuine, active community around \$FIRU through transparent communication, fair tokenomics, and steady, realistic milestones rather than unsustainable hype.

3. Token Overview

Name	SuperFirulai
Symbol	FIRU
Blockchain	Solana
Total Supply	1,000,000,000 FIRU (fixed)
Contract Address	7HvY2dyYYtzkjU1u9kniGyuTe41KwVxDCefywaTVf8rV
Official Website	https://superfirulai.com

4. Tokenomics

The total supply of 1,000,000,000 \$FIRU is fixed — no further tokens can be minted. The distribution is as follows:

Allocation	%	Amount (FIRU)	Purpose
Liquidity	55%	550,000,000	Provides trading depth and price stability on DEXs
Community	20%	200,000,000	Rewards, campaigns and community-driven initiatives
Marketing	10%	100,000,000	Promotion, partnerships and growth
Team	10%	100,000,000	Long-term contributor incentives
Burn	5%	50,000,000	Permanently removed from circulating supply

5. Security & Transparency

Rather than asking holders to trust the team's claims, every security-relevant fact about \$FIRU can be checked independently using public, third-party tools:

Verifiable contract. The contract address is public and can be inspected at any time on Solscan: solscan.io/token/7HvY2dyYYtzkjU1u9kniGyuTe41KwVxDCefywaTVf8rV

Liquidity locked forever, in two parts. \$FIRU liquidity is permanently locked on StakePoint, split across two independent locks, each independently verifiable on-chain:

stakepoint.app/locks/cmqq1lpqj0000jv04rr3n6s6m and stakepoint.app/locks/cmqlikshrk0000ky043813hgut

Independent contract scan. The contract can be scanned for risks and unusual permissions at any time using De.Fi Scanner:

de.fi/scanner/contract/7HvY2dyYYtzkjU1u9kniGyuTe41KwVxDCefywaTVf8rV?chainId=sol

6. Roadmap

Phase	Status	Milestones
Phase 1 — Foundation	Completed	Contract deployed on Solana, initial liquidity locked, official website live, first communities on X and Telegram.
Phase 2 — Growth	In progress	Expansion to new exchanges and Web3 wallets, community campaigns (including TaskOn), growing trading volume.
Phase 3 — Ecosystem	Upcoming	New partnerships within the Solana ecosystem and tools built for the \$FIRU holder community.

7. Community & Governance

\$FIRU is community-first by design. Official channels are:

- X (Twitter): x.com/superfirulai
- Telegram (official channel): t.me/superfirulai
- Telegram (community chat): t.me/superfirulaicommunity
- TaskOn (community quests and rewards): taskon.xyz/quest/337685846

Holders are encouraged to verify any announcement against these official channels and the on-chain facts above — not against unofficial groups or accounts claiming affiliation with the project.

8. Team

The SuperFirulai team is currently **anonymous**. This is a deliberate choice at this stage of the project, common across the Solana meme token ecosystem, and is not intended to reduce accountability: instead of asking the community to trust the team's identity, \$FIRU is built so that the facts that matter most — supply, liquidity locks,

and contract behavior — are independently verifiable on-chain by anyone, as detailed in Section 5. The team may choose to reveal its identity in the future as the project matures.

9. Risks & Disclaimer

- \$FIRU is a meme token with no intrinsic utility, revenue, or guarantee of value. Its price is driven entirely by market sentiment and speculation.
- Cryptocurrency markets are highly volatile. It is possible to lose some or all of the value of any amount invested.
- This document is provided for informational purposes only and does not constitute financial, investment, legal or tax advice.
- Always verify contract addresses, links and official channels directly against superfirulai.com before interacting with any wallet, exchange, or third-party service.
- Do your own research (DYOR) before acquiring \$FIRU or any other digital asset.
